### How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

### Risk rating

CI Investments Inc. has rated the volatility of this fund as **low to medium**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?" section of the fund's simplified prospectus.

### No guarantees

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.

## How has the fund performed?

This section tells you how Class A securities of the fund have performed over the past 8 calendar years. Returns are after expenses have been deducted. These expenses reduce the fund class' returns.

### Year-by-year returns

This chart shows how Class A securities of the fund performed in each of the past 8 calendar years. The fund class dropped in value in 2 of the last 8 calendar years. The range of returns and change from year to year can help you assess how risky the fund class has been in the past. It does not tell you how the fund class will perform in the future.

### Best and worst 3-month returns

This table shows the best and worst returns for Class A securities of the fund in a 3-month period over the past 8 calendar years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
<b>Best return</b>	17.7%	May 31, 2009	Your investment would be \$1,177.
<b>Worst return</b>	-23.6%	November 30, 2008	Your investment would be \$764.

### Average return

The annual compounded return of Class A securities of the fund was 5.6% since inception. If you had invested \$1,000 in the fund on the inception date, your investment would now be worth \$1,586.

## Who is this fund for?

### This fund may be suitable for you if you:

- want to invest in a diversified portfolio of equity and fixed income securities
- want active asset allocation among equity securities, fixed income securities and cash
- are investing for the medium term
- can tolerate low to medium risk.

## A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws of where you live and whether you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

## How much does it cost?

The following tables show the fees and expenses you could pay to buy, own and sell Class A securities of the fund. The fees and expenses — including any commissions — can vary among classes of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

### 1. Sales charges

You may have to choose a sales charge option when you buy Class A securities of the fund. Ask about pros and cons of each option.

## 2. Fund expenses

You don't pay these expenses directly. They affect you because they reduce the fund class' returns.

As at March 31, 2016, the total fund class' expenses were 2.55%. This equals \$25.50 for every \$1,000 invested.

	Annual rate (as a % of the fund class' value)
<b>Management expense ratio (MER)</b>	
This is the total of the fund class' management fee (which includes the trailing commission), administration fee, and other expenses.	2.45%
<b>Trading expense ratio (TER)</b>	
These are the fund class' trading costs.	0.10%

### More about trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the fund class. It is for the services and advice that your representative and their firm provide to you.

CI Investments Inc. pays the trailing commission to your representative's firm. It is paid from the fund class' management fee and is based on the value of your investment. The rate depends on the sales charge option you choose.

Sales charge option	Amount of trailing commission	
	in percent (%)	in dollars (\$)
<b>Initial sales charge</b>	0% to 1.00% of the value of your investment each year	\$0 to \$10.00 each year on every \$1,000 invested
<b>Standard deferred sales charges</b>	0% to 0.50% of the value of your investment each year	\$0 to \$5.00 each year on every \$1,000 invested
<b>Low-load sales charges</b>	0% to 0.50% of the value of your investment each year	\$0 to \$5.00 each year on every \$1,000 invested

The standard deferred sales charge trailing commission rate changes to the initial sales charge trailing commission rate on the seventh anniversary of the investment, and the low-load sales charge trailing commission rate changes to the initial sales charge trailing commission rate on the third anniversary of the investment.

## 3. Other fees

You may have to pay other fees when you buy, hold, sell or switch securities of the fund.

Fee	What you pay
<b>Short-term trading fee</b>	Up to 2% of the net asset value of the securities you redeem, if you sell or transfer your securities within 30 business days of buying them. This fee goes to the fund.
<b>Transfer fee</b>	Your representative's firm may charge you up to 2% of the net asset value of securities you switch to another fund.
<b>Program minimum fee</b>	If you participate in one of our managed programs, we may charge you an annual fee of up to 0.35% of the net asset value in the fund within the program, payable to us quarterly by the redemption of securities (without charges), if your investment is less than the program minimum.
<b>Reclassification fee</b>	If you are switching Class A, AT5, AT6, AT8, U, UT6 or Z securities to a different class of securities of the same fund, you may have to pay to us a reclassification fee if you bought your securities under a deferred sales charge option. This fee is equal to the sales charge you would pay if you sold such securities.
<b>NSF cheque fee</b>	There is a \$25 charge for all cheques returned because of insufficient funds.

### What if I change my mind?

Under securities law in some provinces and territories, you have the right to:

- withdraw from an agreement to buy mutual funds securities within two business days after you receive a simplified prospectus or Fund Facts document, or
- cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the simplified prospectus, annual information form, Fund Facts document or financial statements contain a misrepresentation. You must act within the limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.
